MASTER OF HEALTH CARE

KPT/JPS(PA 5504)7/22

PROGRAMME DESCRIPTION

The Master of Healthcare program is designed as a transformative program, which offers students the education, training, and first-hand experience essential for successful international careers. It will develop in-depth knowledge and practical skills in order to enhance students' performance as a healthcare professional and improve the effectiveness of care towards patients and their families. The program combines the precise training in Health Information Technology and practice with the analytical and quantitative tools of health policymaking. It is also suitable for those who have recently qualified at bachelor level and wish to enhance their studies in healthcare sector. Relevant experienced healthcare professionals can enhance their skills and knowledge in their specific area of practice by choosing part time mode of this program. After completion of this course, students can be employed by private medical practices, hospitals, healthcare networks or insurance companies. These professionals could improve effectiveness and quality of healthcare system, through organized community effort.

PROGRAMME AIM

The program of Master in Contemporary Healthcare is intended for those, who desire to pursue a career in the health care industry. Students would learn in detail about the varied aspects of health care. Knowledge acquired through this program, would help the students to implement effectual methods of cure, in the future and prove their competency in the professional field or to be specific, in the health care sector. The primary aim of the program is

- ▶ To provide basic idea about the contemporary health system, health principles values and practices that improves the efficiency, effectiveness and quality of healthcare services.
- ▶ To train graduates who can adapt protocols and procedures for progressing theories and manage information related to contemporary health care sector for the betterment of healthcare outcomes.
- ▶ To prepare graduates able to solve problems related to contemporary health in general with scientific skills.
- ▶ To inculcate professional attitudes, ethical conducts and social responsibilities for facing challenges of the global employment market and to strengthen and develop their broader personal and professional skills to work internationally in health departments, with non-government organizations, and with different business cultures.
- ▶ To develop graduates who can take leadership role with good teamwork, communication, problem-solving and scientific skills in planning and implementing tasks of health professionals according to global health care perspectives.
